PROFESSIONAL SUMMARY

Site Reliability Engineer with 3+ years of enterprise-scale platform reliability and observability experience. Proven track record owning SLI/SLO error budget frameworks, on-call incident response with PagerDuty, and Kubernetes infrastructure across 10 clusters and 81 nodes in HIPAA-regulated environments. Deep expertise in Dynatrace, OpenTelemetry (OTel), Terraform IaC, and CI/CD automation with AWS Certified credentials.

TECHNICAL SKILLS

ITSM & SRE: ITIL Service Management, Incident Response, On-Call Rotation, Error Budget Management, SLI/SLO Definition, Blameless Postmortems, Root Cause Analysis, Capacity Planning

DevOps & Orchestration: Kubernetes/EKS (10 clusters, 81 nodes), Docker, GitHub Actions, Azure Pipelines, Jenkins, Harness, CI/CD Pipeline Design

Infrastructure as Code: Terraform, Ansible, Monaco, CloudFormation

Cloud Platforms: AWS (EC2, EKS, S3, CloudWatch, Lambda), Azure, Google Cloud Platform

Monitoring & Observability: Dynatrace (Davis AI, ActiveGate, OpenPipeline, Workflows), OpenTelemetry (OTel), Splunk, Grafana, Datadog, Prometheus, CloudWatch, PagerDuty

Log Management & Pipelines: Dynatrace OpenPipeline, Splunk (ingestion/forwarders), Elasticsearch (ELK), Filebeat, Fluentd, Logstash

Programming & Scripting: Python, Bash/Shell, PowerShell, Go, TypeScript, RESTful APIs

Operating Systems: Linux (Red Hat, Ubuntu), Windows Server

WORK EXPERIENCE

HealthEquity | **Site Reliability / Observability Engineer** | *Jan 2024 – Present | Remote*

- Managed Kubernetes infrastructure across 10 clusters and 81 nodes in HIPAA-regulated production environments; owned on-call rotation using PagerDuty, reducing MTTR through runbook automation and alert noise reduction
- Built and maintained SLI/SLO frameworks with error budget burn-rate alerting — scripting automation in Python and Bash, maintaining ITIL-aligned runbooks and audit documentation for HIPAA compliance
- Administered Dynatrace at enterprise scale across 2000+ Linux/Windows hosts — transformed alert management from near-zero visibility to full MELT telemetry (Metrics, Events, Logs, Traces) coverage through Davis AI tuning, ActiveGate deployments, and custom alerting policies
- Designed log ingestion pipelines via Dynatrace OpenPipeline and Splunk, implemented CI/CD via Azure Pipelines and GitHub Actions, and connected 30+ GitHub repositories to surface DORA metrics and deployment health signals in real time
- Engineered a platform configuration drift detection tool using Monaco and Terraform, automated via Azure Pipelines on a rolling schedule — ensuring environment consistency and enabling rollback across dev/staging/prod

HealthEquity | **Observability Intern** | *May 2023 – Jan 2024 | Remote*

- Performed gap analysis identifying monitoring blind spots; implemented 15+ new dashboard visualizations in Splunk and Dynatrace, improving infrastructure visibility and reducing mean time to detect
- Supported infrastructure automation including Tanium-based provisioning with zero critical failures across 500+ deployments

ACE Media Solutions LLC | **Founder & DevOps Engineer** | *May 2021 – Present | Remote*

- Built scalable DevOps pipelines on AWS, GCP, and Vercel; implemented Grafana and Datadog monitoring with automated alerting, decreasing incident detection time by 80%

Mizzou DoIT | **IT Support Specialist** | *Apr 2022 – May 2023 | Columbia, MO*

- Provided enterprise IT support following ITIL incident management processes, maintaining 98% satisfaction across 2000+ tickets; managed hardware lifecycle for 500+ devices with 99.5% service availability

CERTIFICATIONS

AWS Certified Developer – Associate (DVA-C02)

AWS Certified Cloud Practitioner (CLF-C01)

Dynatrace Certified Associate

ServiceNow Event Management Fundamentals

EDUCATION

University of Missouri – Columbia | Bachelor of Science, Information Technology | Minor in Mathematics | 2024
